

SHETH L.U.J. & SIR M.V. COLLEGE OF SCIENCE
SUBJECT - Data Analysis with R/SAS/SPSS

Aim - Generating frequency tables using table() or count() (R).

Output :

The screenshot shows the RStudio environment with the following components:

- Source Editor:** Contains R code to load a dataset and view its structure.
- Console:** Displays the execution output of the R code.
- Environment:** Shows the loaded dataset 'data' with 80,000 observations and 25 variables.
- Files:** Lists files in the current directory, including 'Cancer.dataset.csv'.

R Code in Source Editor:

```
# Clear workspace
rm(list = ls())
# Load the dataset
data <- read.csv("Flipkart.csv")
# View first few rows
head(data)
```

Console Output:

```
R - R 4.2.2 - ~/R
> # Clear workspace
> rm(list = ls())
> # Load the dataset
> data <- read.csv("Flipkart.csv")
> # View first few rows
> head(data)
